

“Behlen has been involved in MBMA since the beginning. We were one of the founding companies and we have always considered MBMA to be a valuable source mainly on technical issues—to help with codes and standards, along with the statistics we get. But really, the more I got involved with MBMA, the more I realized it’s about relationships. People help each other a lot in this organization and that’s really why we’re still here.”

-Phil Raimondo, President,
Behlen Building Systems

WHAT IS MBMA?

The Metal Building Manufacturers Association (MBMA) is comprised of leading firms that share a common goal of growing and improving the metal building industry. MBMA is the only association dedicated to engineering and technical issues, research, codes and standards, insurance and fire ratings, and enhancing the energy efficiency of the building envelope. Together, we can grow market share, plan for the future, protect our industry and its position, and repel threats from a changing marketplace.

Advancing High-tech
Metal Building Solutions for
Low-rise Construction

Founded 1956

OUR PURPOSE, OUR PASSION

RESEARCH: To identify and sponsor research that improves the performance and value of metal building systems.

LEADERSHIP: To spearhead continued efforts to expand the use of metal building systems throughout the U.S.

EDUCATION: To elevate the prominence and stature of metal building systems in all relevant aspects of American culture and to educate developers, building owners, design professionals and educators.

“Being part of the MBMA is very important to me and to Butler Manufacturing because it really makes us a part of this industry. It’s about working with other industry partners to make sure we set the standards and that we progress the industry and really create a high reputation for all of us.”

-Greg Pasley, President,
Butler Manufacturing

WHY JOIN MBMA?

- **Technical Expertise** - MBMA’s technical staff are experts on structural design, energy code compliance, fire resistance and sustainability
- **Proprietary Statistical Data** - Sales and shipment trends, market share, geographic distribution down to the county level
- **Access to Projects** - Metal building projects that are only available to MBMA members and AC472 accredited companies
- **Networking** - Join your peers, suppliers and competitors to work together for the advancement of the industry

WORKING TOGETHER MAKES EVERYONE STRONGER

TOGETHER WE DO MORE

RESEARCH

- Resiliency of metal roofs and walls subjected to severe weather
- Seismic performance of metal buildings
- Green and sustainable metal building systems
- Advanced fire protection and energy code compliance options for metal buildings
- Comprehensive market perception survey identifying opportunities and challenges for metal buildings

LEADERSHIP

- Representation and advocacy at ICC, ASCE, USGBC/LEED, ASHRAE, ASTM, AISI, AISC and UL
- Dozens of active committees, subcommittees and task groups involving more than 500 professionals representing over 100 member companies
- Presentations to university students and industry groups including AIA, ICC, CSI and MBCEA

EDUCATION

- Complete MBMA library of technical reports covering structural, seismic, fire resistance, energy and metal roofs
- Support of student Capstone courses at universities across North America
- Award-winning AIA online courses for architects published in conjunction with *Architectural Record* magazine
- AIA-approved lunch and learn CEU courses for architects
